Multimedia / Data Projector Service Application Form

In the dusty environment multimedia projectors are prone to be asphyxiated and sometimes die a spectacular death, by either, the lamp exploding, or blood red blotches on the display caused by burns on the optical unit.

Secondly the daunting prospect of the projector switching off intermittently due to overheating, and displaying the error message "Please clean Filter", say, during an important presentation!

It is recommended by manufacturers for the projector, in a school environment, to be *cleaned and serviced every 6 months*, so as to get the maximum lamp life and reliability from the machine.

It therefore makes sense to do this, as the average *price for a projection lamp is around £250*. The optical unit costs something astronomical, which may warrant the projector being written off. That is not even counting labour charge and paying out for repair estimates that are not taken up - a costly exercise.

This effective service gives peace of mind, knowing that you won't be presented with a hefty bill that could have been avoided.

AV Service offers real value for money. We also are willing to work around you working schedule.

What we do - What it costs

We come to your business or school twice a year.

1st Visit - Cosmetically clean or change filter. Clean lamp housing and all external accessible areas. Check wiring. Check safety of harness.

2nd Visit - This is a more comprehensive service. The same as 1st Visit, but depending on the type of projector and ingress of dust. Remove projector to our workshop, where the machine is stripped down and all the internal optics cleaned, and the interior build of dust removed.

The cost is, per projector, including all travel charges - just *One Fixed Price*.

I am interested in subscribing to the above service (Tick Box)
